EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Bolan on January 7, 2005.

The application has been amended as follows:

In claim 15 line 5 after "surface" – extends along a plan substantially perpendicular to a longitudinal axis of the elongate catheter, and -- has been inserted.

In claim 27 line 8 after "surface" – extends along a plan substantially perpendicular to a longitudinal axis of the elongate catheter, and -- has been inserted.

In claim 43 line 6 after "surface" – extends along a plan substantially perpendicular to a longitudinal axis of the elongate catheter, and -- has been inserted.

Claims 59-61 have been deleted.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a catheter assembly comprising an elongate catheter; and an expandable electrode body mounted proximate one end of the catheter with the electrode body configured to form a pronounced ring and the pronounced ring defining a primarily distal facing surface of the electrode body, wherein the distal facing surface extends along a plane substantially perpendicular to a longitudinal axis of the elongate catheter and includes an area configured to emit radio frequency energy.

Art Unit: 3739

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
